Action Plagiarius | Museum Plagiarius | Awards | Exhibitions

Aktion
Plagiarius

"Innovation vs. Imitation - Plagiarius" accuses imitators for their unimaginative and shameless behaviour!

Initiated already back in 1977 by Prof. Rido Busse, the negative award "Plagiarius" serves to inform the public about the problem of fakes and plagiarisms and the negative impacts they have on not only the economy as a whole, but also on small companies and designers. Action Plagiarius awards the negative award at the annual "Ambiente" trade fair during a press conference. The award is given to those com-panies that the jury has found guilty of making "the most flagrant" design imitations. As his key figure, Busse chose a gnome, which he painted black with a gold nose to signify the "illicit earnings from product imitation".

Trelise Cooper kids rips off Emily Temple Cute Lulu

AttorneyScott Commentary:

In the United States, unlike most developed nations, the cut or silhouette of a piece of clothing is not subject to copyright protection because the powers that be feel that clothing is 'utilitarian' and thus cannot be art. Many would disagree, I imagine.

The design printed on the fabric of a garment is, however, subject to protection as a two-dimensional work of art. If someone copies the fabric design of another without permission, that someone will be liable for copyright infringement. Is that the case below?

***

Dear YTWWN:

You'd think after Grey-Bow-Sweater-Gate Trelise Cooper would be done with plagiarism. Especially of Japanese brands, as Alannah Hill got picked up for ripping off Emily Temple Cute around the same time. Yes, ladies, other people who like fashion have heard of Japanese lolita brands as well.

But I saw this Trelise Cooper kids' dress on Ebay and thought it looked strangely familiar:

What is this place?

YTWWN is a blog where users have taken notice to a blatant rip off of a creative work, and shared it with us. Sharing and discussing the observations and casualties of improper use of creative property is what we're all about here.

This is an open blog, so please, add to and join the discussion, but keep in mind that there is a fine line between a rip-off and similarity of ideas. Please read the 'About' page before posting.

Please use some discretion before posting to help us keep this blog legitimate.

We look forward to seeing what you have to share.

About iTrace

iTrace is a unique tool that enables you to search by image rather than text, and to check visual arts submissions against a database of existing visual works. For this pilot project, the tool will be checking against the VADS database of 120,000 images. iTrace was developed through the JISC-funded Spot the Difference project, which is a collaborative venture between VADS and the Centre for Vision, Speech, and Signal Processing (CVSSP) at the University of Surrey, and it utilises technologies pioneered by the CVSSP. Follow the project on our blog at: www.vads.ac.uk/spot

VADS

VADS is a research centre of the University for the Creative Arts. It also holds the national image repository on behalf of the arts sector, a growing collection of over 120,000 digitised images from universities, art colleges, libraries, museums, and archives across the UK. The images are free for use in learning, teaching, and research, and cover the full breadth of the visual arts including applied arts, architecture, design, fine art, and media. View all the VADS images at: www.vads.ac.uk
